Quasar Scan Cardholder Data Discovery Install & Go Guide

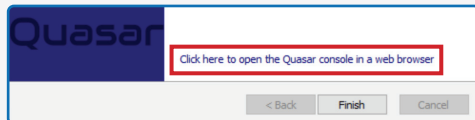

Getting started

Thanks for downloading our free Quasar Scan 'Evaluation Edition'! This guide will take you through software setup, before performing a scan and viewing results. This quick activity will help you easily assess Quasar Scan's suitability for use inside your organisation.

1

Install Quasar

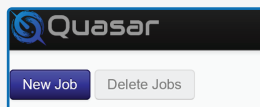

- Run the downloaded Setup exe installer.
- Once the installation is complete, and **before** selecting 'Finish', click the provided link to open Quasar's web console. The Quasar Scan web console/server will also be in your apps list/start menu.

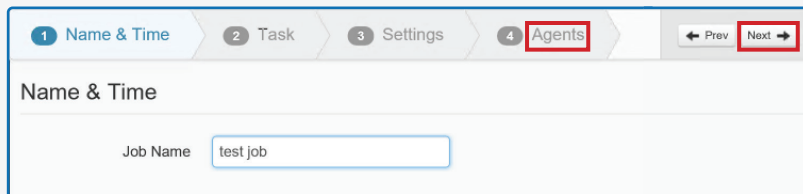

2

Schedule your scan

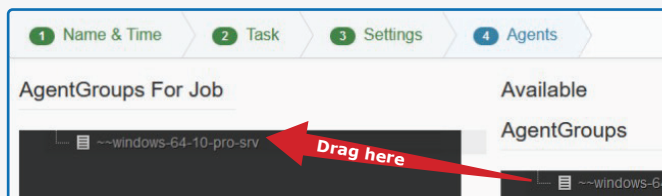

- Click the 'New Job' button.

- Enter a name and 'Next' your way through the Job Scheduler until you reach the 'Agents' tab.

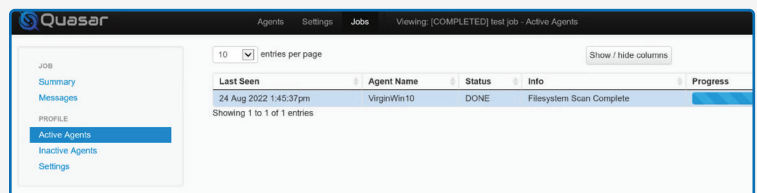

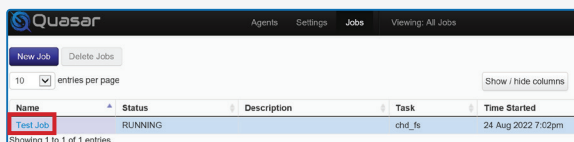

- Drag your machine name from the 'Available' box to the 'For Job' box. If your machine is not visible, there may be a firewall or whitelisting conflict. Contact us to find out more.

3

Run your scan

- Hit 'Finish', then click your job in the jobs list and watch progress under 'Active Agents', and by refreshing the page.

4

Save your scan

- After 5 minutes, if your job is still running, you can do a 'live export'. Simply click 'Export Job', enter a password & hit the 'Export' button.

The screenshot shows the Quasar web interface. At the top, there are tabs for 'Agents', 'Settings', 'Jobs', and 'Viewing: [COMPLETED]'. Below this, there's a 'JOB' section with a 'Summary' tab selected. To the right, there are buttons: 'Edit Job', 'Abort Job', 'Clone Job', and 'Export Job'. The 'Job Info' section shows a job ID '(0b42c3c3d240ce90d483d95ba0c52)' and a status of 'COMPLETED'. Below this, there's an 'Export Job' section with a 'Status' of 'Ready', a 'Progress' bar, a 'Filename' of '2022-08-24_135142_test_job.qsa', and a 'Passphrase' field with a placeholder 'Enter a password'. An 'Export' button is at the bottom. To the right, a smaller box shows the 'Export Job' status as 'Complete - click here to download'.

- Download the results (.qsa) file from the download link which will appear.

5

View your results

- Open the QSA file in the desktop app 'Quasar Viewer', using your password. The viewer application will be located in your start menu.

The screenshot shows the 'Open File' dialog in the Quasar Viewer application. It prompts the user to 'Enter Passphrase' for a file named 'QSA File'. A message box says 'File is encrypted, please enter passphrase'. There are 'OK' and 'Cancel' buttons. The background shows a file explorer view with a 'Browse...' button and a 'Waiting for passphrase' message.

Helpful hint
Readjust the scaling in your display settings if you'd like text to be larger or smaller

- The summary page will appear with information about your scan.

The screenshot shows the 'Summary' page in the Quasar Viewer application. It displays job information: 'COMPLETED test job', 'Window: 24 Aug 2022 1:42pm - 27 Aug 2022 1:42pm', 'Started: 24 Aug 2022 1:45pm', 'Ended: 24 Aug 2022 1:45pm', and 'Duration: 00:00:01 - 1 second'. Below this, there's a 'Results Summary' table with columns for 'PAN', 'Track', 'Files', 'Pan13', 'Pan14', 'Pan12', 'Pan18', 'Pan19', 'Propcard', 'Custombin', 'Messages', 'AgentDate', 'Agents', 'InactiveAgents', 'Settings', and 'Reports'. The table shows 'PAN scored > 0 (likely) 0', 'PAN scored = 0 (possible) 0', and 'PAN scored < 0 (unlikely) 0'. It also shows 'Files Scanned 2' and 'Files Not Scanned 7'.

- Click into the 'PAN' tab and click the 'RUN' button.

The screenshot shows the 'PAN' tab in the Quasar Viewer application. It displays a table of card data with columns: 'Brand', 'Country', 'Issuer Bank', 'HID', and 'Score'. The table is sorted by 'Score' in descending order. Below the table, there's a 'RUN' button and a 'PAN Filters' section with a 'DEFAULT' dropdown and buttons for 'Clone', 'Delete', 'Add Filter', and 'All'. The 'PAN Filters' section also has a 'RUN' button and a 'PAN Filters' input field.

- Tabulated card data will be displayed, sorted by score (higher = better). Re-order, re-arrange or filter data however works for you.
- All data is shown, except 'File Locations', which will be blurred or dashed. To uncover file locations a license is needed. Please see the next page for more detail.

Quasar Scan Cardholder Data Discovery Install & Go Guide

Quasar Scan product options: Evaluation v Enterprise

	Evaluation Edition (Free)	Enterprise Edition (Licenced)
All in one installer	✓	✓
Local scanning	✓	✓
Enterprise Scanning	✓	✓
View scanning results, CHD hits & weighted 'score'	✓	✓
View CHD location detail	✗	✓
Export full scan results for data processing	✗	✓

In Evaluation Edition you can export data but the file paths, field name/field value, and PAN are truncated.

Now that you've completed an initial local scan to prove Quasar Scan's capability, we are available to help you scale and support wider scanning that meets your organisations requirements.
